OBJECTIVE

Hardworking and passionate job seeker with strong organizational skills eager to secure an apprenticeship or internship Front End Developer position.

Clear understanding of tasks, training and required skills. Motivated to learn, grow and excel as a Front End Developer. Good team player, hard worker and ready to help the team achieve company goals.

SKILLS

- Proficient in HTML, CSS, JavaScript, Typescript, React Js, Next Js and GIT.
- Worked with React packages like Redux, React-Router, Axios, Material UI etc.
- Knowledge and experience coding with Python and Django as a framework.
- Understanding of Cloud development services and functions with AWS
- Knowledgeable in responsive design and cross-browser compatibility.
- Familiar with Agile development methodology.
- Excellent problem-solving skills and ability to work in a team environment.

EXPERIENCE

University of Lagos-Engineering Ladies Day - *Front end Developer*

Contract: April - Present

- Developed a slick website for a programme, Engineering Ladies Day from scratch using ReactJs, Nodejs and Next Js.
- Worked with a UI/UX team in an Agile environment and translated figma designs into real working web pages.
- Cooperated with a backend team to keep track of user data, edit, utilize and display it on the web application when needed.
- Running and writing Unit Test in the web application using Jest.
- Frequent communication with the rest of the frontend team to ensure unity in the development process.

Side Hustle, Ibadan - *Front end Developer Volunteer*

September 2022 - February 2023

- Developed and maintained the organization's website using HTML, CSS and JavaScript.
- Collaborated with team members utilizing Git and Github to design and implement new features to improve user experience.
- Conducted regular website maintenance and updates.

- Added and modified features of the website while communicating in an agile environment.

PROJECTS

ShopChain - February 2023 - Present

Still in development

- Building an E-commerce website to be used in a certain location frequently.
- Working with a team of a backend developer and a product designer.

Personal Portfolio - December 2022

[Link at the top](#)

- Built a slick portfolio showcasing my completed projects built with JavaScript, ReactJs, Bootstrap and many others.
- Deployed the website to a live server using Netlify.
- Used Tailwind CSS and Material UI packages to build the project from scratch.

Netflix Clone - September 2022

[See in Portfolio](#)

- Created a clone of netflix which collects film data from an API and displays it beautifully on the frontend.
- Utilized Firebase as my backend and Tailwind for CSS.
- Implemented responsive design and ensured cross-browser compatibility.
- Used packages like React-Router and Axios in development.

Quizzical - May 2022

[See in Portfolio](#)

- My very own trivia website that tests your knowledge on anything and everything.
- Made use of React hooks in the development process.

EDUCATION

University of Lagos, Lagos - Biomedical Engineering

September 2020 - May 2024

Relevant Coursework: Fundamentals of Programming, Web Development, UI/UX Design, Database Systems, Data Structure and Algorithms.
